

WEEKLY THREAT ADVISORY NO. 709

(22 - 28 May 2025)

Summary of Threat Activities and Conclusion

1. Pirate and maritime crime activity in East Africa and the Indian Ocean HRA saw an increase in the number of piracy activities in the HRA. US Naval Intelligence has issued warnings which were featured in WETA No. 696. There were no reports of incidents against commercial vessels this past week. The threat level remains high given the political volatility and tension in the region which, criminal and pirate syndicates may exploit.
2. Based on the geographical development, the general forecast is that the piracy situation will persist even though the conflict between Israel, the Hamas, the Hezbollah, the Houthis, Iran and other Arab factions seems to stabilise. The new political problem brewing in Syria may be another flash point to spark a new conflict among the warring fraction. In the meantime, pirate and criminal syndicates operating in Somalia will exploit the turmoil and chaos to conduct opportunistic attacks against defenceless commercial shipping. UMS HQ warns all stakeholders, that the maritime industry should brace for increased pirate activity as the post-monsoon season brings calmer seas. In WETA No. 689, UMS HQ issued an Annex for instructions on enhanced measures during this period.
3. **The Joint Maritime Information Centre Advisory Note 007/25**
 - 3.1. The Joint Maritime Information Centre (JMIC) issues this advisory to alert commercial shipping and associated maritime stakeholders regarding a recent declaration by the Houthi-controlled 'Harakat al-Houthis Operations Command Council' (HOCC). The statement, released via affiliated media channels, indicates an expansion of their threat posture in the Red Sea and Gulf of Aden. According to the declaration beginning 20 May 2025, vessels that have called at the Israeli port of Haifa or are alleged to have collaborated with Israeli entities may now be subject to targeted action by HOCC elements.

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

3.2. This expanded criteria explicitly includes sister ships—vessels under the same ownership, management, or operator network—as part of the new targeting posture. This implies that a vessel may be deemed hostile by HOCC not due to its own operational history, but solely because another vessel in its corporate structure has engaged in Israeli port activity. The risk applies regardless of flag, cargo, or current voyage route. ***JMIC notes that this is very similar to the May 2024 Houthi Phase 4 announcement of attacks expanded to include ships whose owners/operators have vessels visiting Israeli ports.***

3.3. In response, JMIC strongly urges all shipping companies and operators with vessels transiting the Red Sea, Bab al-Mandeb Strait, and the Gulf of Aden to:

3.3.1. Conduct a comprehensive audit of any Haifa, Israel port calls within their fleet, including those of sister vessels, time-chartered vessels, and vessels under common beneficial ownership or technical management.

3.3.2. Evaluate their digital footprint, including AIS transmission logs, vessel-tracking platforms, and public maritime databases, for any historical linkage that could be interpreted by HOCC-affiliated actors as grounds for targeting.

3.3.3. Reinforce cybersecurity and information control protocols, particularly concerning voyage routing, port call data, and affiliations that may be available through open-source intelligence (OSINT) methods.

3.4. JMIC will continue to monitor the situation and provide updates as required.

4. U.S. Maritime Advisory 2025-006: Worldwide - Foreign Adversarial Technological, Physical and Cyber Influence. Issued on 9 April 2025. This advisory seeks to alert maritime stakeholders of potential vulnerabilities to maritime port equipment, networks, operating systems, software, and infrastructure. Foreign companies manufacture, install, and maintain port equipment that create vulnerabilities to global maritime infrastructure information technology (IT) and operational technology (OT) systems. The U.S. Government in the past few years has published

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

several documents illuminating the risks associated with integrating and utilizing China's state-supported National Public Information Platform for Transportation and Logistics (LOGINK), Nuctech scanners, and automated ship-to-shore cranes worldwide. For more information about U.S. Maritime Alerts and Advisories, please visit <https://www.maritime.dot.gov/msci/>. This advisory cancels U.S. Maritime Advisory 2024-011 and will automatically expire on 6 October 2025.

5. U.S. Maritime Advisory 2025-005: Red Sea, Bab el-Mandeb, Gulf of Aden, Arabian Sea, Persian Gulf, and Somali Basin - Houthi Attacks on Commercial Vessels. Issued on 28 March 2025. This advisory cancels U.S. Maritime Advisory 2025-001. On 15 March, U. S. forces commenced strikes against targets used by Houthi terrorists in Yemen to launch attacks against commercial and military vessels operating within international shipping lanes. Houthi forces have subsequently threatened to strike U.S. assets, including commercial vessels, and are at high risk until further notice. For maritime industry questions about this advisory, contact the Global Maritime Operational Threat Response Coordination Center at GMCC@uscg.mil. Supplemental information about U.S. Maritime Alerts and Advisories, including subscription details, may be found at: <https://www.maritime.dot.gov/msci>. This message will automatically expire on 24 September 2025.
6. US Naval Intelligence has issued a new advisory. U.S. Maritime Advisory (2025-004: Black Sea and Sea of Azov - Military Combat Operations) Issued on 5 March 2025. This advisory cancels U.S. Maritime Advisory 2024-012. Since February 2022, projectiles have reportedly struck commercial vessels and experienced explosions in the Black Sea and Sea of Azov. There have also been reports of moored and drifting naval mines. While some past actions may have targeted specific commercial vessels due to their association with certain countries or their activity, the potential remains for miscalculation or misidentification, resulting in a high risk of damage to commercial vessels in the region. For more information about U.S. Maritime Alerts and Advisories, including subscription details, please visit <https://www.maritime.dot.gov/msci>. This advisory will automatically expire on 1 September 2025.
7. US Naval Intelligence has issued three advisories, and all stakeholders, including Masters, crew members, Team Leaders, and maritime marshals, are to heed these warnings.

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

- 8. Three U.S. Maritime Advisories (2025-001, 2025-002, and 2025-003) were issued on 14 February 2025.** These advisories clarify specific threats faced in the Red Sea, Bab el Mandeb Strait, Gulf of Aden, Gulf of Oman, Arabian Sea, Strait of Hormuz, and Indian Ocean. For maritime industry questions on these advisories, contact the Global Maritime Operational Threat Response Coordination Center at GMCC@uscg.mil. Supplemental information about U.S. Maritime Alerts and Advisories, including subscription details, may be found at <https://www.maritime.dot.gov/msci>. These advisories will automatically expire on 11 August 2025.
- 9. U.S. Maritime Advisory 2025-001: Southern Red Sea, Bab el Mandeb Strait, and Gulf of Aden - Houthi Attacks on Commercial Vessels.** This advisory cancels U.S. Maritime Advisory 2024-008. On 19 January 2025, Houthi officials in Yemen claimed that they were ceasing their attacks on U.S.- and U.K.-flagged, owned, and affiliated commercial vessels; commercial vessels partially owned or managed by Israeli individuals or entities; and commercial vessels bound for Israeli ports. Due to current uncertainty regarding these Houthi announcements, commercial vessels remain at risk from terrorism and other hostile actions from the Houthis when transiting this region until further notice.
- 10. U.S. Maritime Advisory 2025-002: Strait of Hormuz, and Gulf of Oman - Iranian Illegal Boarding / Detention / Seizure.** This advisory cancels U.S. Maritime Advisory 2024-009. Although there is no specific threat to U.S.-flagged vessels, commercial vessels transiting this region may be at risk of being illegally boarded and detained or seized by Iranian forces. Iranian forces have utilized small boats and helicopters during boarding operations and have attempted to force commercial vessels into Iranian territorial waters.
- 11. U.S. Maritime Advisory 2025-003: Gulf of Aden, Arabian Sea, Indian Ocean - Piracy/Armed Robbery / Kidnapping for Ransom.** This advisory cancels U.S. Maritime Advisory 2024-010. Recent cases of piracy pose a general threat to all commercial vessels operating in this region. Since November 2023, there have been seven reported boarding/hijacking incidents. Pirates have utilized captured fishing vessels as motherships. Successful or attempted boardings and suspicious approaches have been reported up to 960 NM off the coast of Somalia. Specific case details are available at <https://www.oni.navy.mil/ONI-Reports/Shipping-Threat-Reports/Worldwide-Threat-to-Shipping/>.

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

- 12.** There have been some calls by some ignorant commercial bodies that do not understand the threat deeply and well enough to call for the removal of AST onboard commercial vessels due to concerns that the onboard AST might cause an incident with approaching naval craft. While the concerns are reasonable, the proposed solution to remove the onboard AST is highly unprofessional and dangerous. Implementing it would make the commercial vessels concerned 'sitting ducks' in the face of attacks by Somali pirates who take advantage of the chaos and distractions caused by the conflict. Some intelligence sources have established that some pirate action groups are working in cahoot with the Houthis. Therefore, we should see the increased attacks by Somali pirates linked with the Houthi activities in the Red Sea and the Arabian Sea. For this reason, UMS HQ instructed how UMS Maritime Marshals will respond and behave when confronted with this situation.
- 13.** All vessels in the vicinity are, therefore, to exercise caution and report any suspicious activity to UKMTO.
- 14.** In the latest quarterly report by UKMTO, it was reported that there has been an increased incidence of suspicious sightings compared to a year ago before the lifting off of the HRA by commercial shipping bodies. Intelligence agencies have unanimously agreed that there would be attempts by pirates' syndicates to exploit hopefully a relaxed attitude by the shipping community, and today we are seeing the manifestation of the situation happening. In other words, the possibility of a successful hijack can only be prevented if vessels have on-board armed security teams (AST) to deter and if necessary, prevent any attack and boarding by pirates.
- 15.** The main message of the Quarterly Reporting by UKMTO is that piracy has been suppressed but not eradicated. So long as the socio-politico-economic problems of Somalia and Yemen are unresolved, the threat of piracy against commercial shipping will remain.
- 16.** All Masters and UMS Maritime are advised to remain vigilant. The increased piracy-related activities in the waters of the Indian Ocean and East Africa/Red Sea have, in fact, been anticipated by intelligence agencies by the removal of the HRA by world commercial bodies but not by the War Committee, which assessed that the present situation has inadvertently increased the threat level.

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

17. UKMTO and other intelligence agencies have noticed increased activities by unmanned aerial vehicles (UAV). This recent development brings a new equation and range of challenges to the safety of commercial vessels transiting in waters that are prone to pirates' attacks in the Northern Indian Ocean and Southern Red Sae and maritime security operations. UMS HQ repeats the article on the subject in paragraph 31 given its importance in understanding the capabilities of UAV in maritime security operations (in particular paragraph 31.6) for a detailed exposition.

18. 2024-001-Southern Red Sea, Bab el Mandeb Strait, Gulf of Aden, Northwestern Indian Ocean, Somali Basin, Arabian Sea, Gulf of Oman, Strait of Hormuz, and Persian Gulf-Threats to Commercial Vessels

18.1. This advisory replaces and cancels U.S. Maritime Advisory 2023-011 and U.S. Maritime Alert 2024-001B

18.2. Issue: Regional conflict, military activity, and piracy pose significant threats to commercial vessels operating in the above listed geographic areas as evidenced by recent Houthi attacks and Somali piracy activity. The U.S. government is continually assessing the maritime security situation in the region to safeguard freedom of navigation, ensure the free flow of commerce, and protect U.S. vessels, personnel, and interests. The recent standup of Operation Prosperity Guardian is one of many examples of U.S. and international cooperative maritime security operations within this region. The following are currently deemed to be the most pressing threats to U.S.-flagged and U.S.-affiliated commercial vessels throughout this region.

18.3. **Houthi Hostile Actions:** Commercial vessels transiting the Southern Red Sea, Bab el Mandeb Strait, and Gulf of Aden are at an elevated risk of hostile actions from the Houthis. Hostile actions include one-way Unmanned Aerial Vehicle (UAV) attacks; ballistic and cruise missile attacks; small arms fire from small boats; explosive boat attacks; and illegal boardings, detentions, and/or seizures. There have been at least 30 separate Houthi attacks on commercial vessels and one Houthi seizure of a commercial vessel in these areas, affecting over 55 nations since November 19, 2023. In November 2023, the Houthis conducted a helicopter-borne landing and seizure of a Bahamas-flagged commercial vessel in the

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

Southern Red Sea. Entities claiming to be Yemeni authorities have also attempted to direct commercial vessels in the Southern Red Sea to divert to Yemen. These threats pose both direct and collateral risks to U.S.-flagged and U.S.-affiliated commercial vessels transiting in international shipping lanes, or otherwise operating in these areas.

18.3.1. U.S.-flagged commercial vessels operating in these areas are advised to remain as far as possible from Yemen's territorial sea without compromising navigational safety. Crewmembers should be especially vigilant when at anchor, operating in restricted maneuvering conditions, or proceeding at slow speeds.

18.3.2. Coordinate voyage planning with U.S. Naval Forces Central Command (NAVCENT) Naval Cooperation and Guidance for Shipping (NCAGS) and consider their recommendations and guidance whenever possible. NAVCENT NCAGS stands a 24-hour watch and has the latest information on the current maritime security threats and the operational environment in this region.

18.3.3. The route taken through these areas, and timing of the transit, remains at the discretion of individual companies and vessel Masters. Transiting these areas during hours of darkness may frustrate efforts to target vessels.

18.3.4. Adherence to all U.S. and international requirements and guidance regarding operation of AIS remains the responsibility of individual companies and vessel Masters. Ships operating with AIS switched on and off have both been the object of Houthi attacks. Switching AIS off makes it marginally more difficult to track or target a ship but may also hinder the ability of coalition forces to provide support.

18.3.5. U.S.-flagged commercial vessels are advised to provide hourly positional email updates to the NAVCENT NCAGS detachment when transiting these areas.

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

18.3.6. Maritime operators are advised to alert their crews to the fact that all electronics signals from their vessels pose a risk to maritime operations.

18.3.7. A missile strike on a Marshall Islands-flagged commercial tanker in the Gulf of Aden on January 26, 2024 resulted in a significant onboard fire. U.S.-flagged commercial vessels carrying flammable, explosive, or otherwise hazardous cargoes are strongly advised to reconsider transit through these areas. However, if planning voyages through these areas, vessels should take all prudent safety precautions, including thoroughly preparing for emergency responses, and considering carriage of additional safety and damage control preparedness supplies and equipment, such as those needed to extinguish fires.

18.3.8. If hailed on VHF by the Houthis, or entities claiming to be Yemeni authorities, and instructed to alter course to Al Hudaydah or another location on the northwest coast of Yemen, U.S.-flagged commercial vessels should ignore the VHF call and continue their passage if safe to do so.

18.3.9. If the Houthis seek to board U.S.-flagged commercial vessels in these areas, the ship's Master should, if the safety of the ship and crew would not be compromised, decline permission to board, noting that the vessel is proceeding in accordance with international law, as reflected in the Law of the Sea Convention.

18.3.10. When combined with evasive maneuvering, vessels transiting these areas with armed security details onboard have successfully deterred boarding by individuals in approaching small craft. The decision whether to embark a contracted armed security detail and assessment of associated risks is the responsibility of individual companies and vessel Masters, who are responsible for establishing use of force guidance and pre-planned responses for vessels carrying contracted armed security details.

18.3.11. If Houthis board a U.S.-flagged commercial vessel without a contracted armed security detail onboard, the crew should not

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

forcibly resist the boarding party. Refraining from forcible resistance does not imply consent or agreement to that boarding.

18.3.12. When operating in these waters, U.S.-flagged commercial vessels should maintain a vigilant lookout at all times. If U.S.-flagged commercial vessels observe or hear a suspected UAV or missile or observe a small boat approaching with apparent hostile intent, crewmembers not needed for the safe navigation and operation of the vessel should be relocated to a safe space until the threat has passed. Additional precautions should be taken to ensure small boats are kept at a safe distance whenever possible.

18.3.13. In addition to U.S. Maritime Alerts and this Advisory, interim industry transit advice for the Southern Red Sea and Gulf of Aden has been established by Combined Maritime Forces (CMF). CMF guidance messages are available on the Maritime Global Security website at maritimeglobalsecurity.org/geography/goa-etc/.

18.4. Iranian Illegal Boarding/Detention/Seizure: Commercial vessels transiting the Persian Gulf, Strait of Hormuz, Gulf of Oman, and Arabian Sea are at risk of being illegally boarded and detained or seized by Iranian forces. Recent incidents include the April 2023 Iranian seizure of a Marshall Islands-flagged vessel in the Gulf of Oman, the May 2023 Iranian seizure of a Panama-flagged vessel in the Strait of Hormuz, and the January 2024 Iranian seizure of a Marshall Islands-flagged vessel in the Arabian Sea. Iranian forces attempted to seize one Marshall Islands-flagged vessel and one Bahamas-flagged vessel in the Gulf of Oman during July 2023, but were prevented from doing so by U.S. Naval Forces. Iranian forces have utilized small boats and helicopters during boarding operations and have attempted to force commercial vessels into Iranian territorial water

18.4.1. If hailed by Iranian forces, U.S.-flagged commercial vessels should provide vessel name and flag state and affirm that they are proceeding in accordance with international law as reflected in the Law of the Sea Convention.

18.4.2. If Iranian forces seek to board a U.S.-flagged commercial vessel navigating these waters, the ship's Master should, if the safety of

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

the ship and crew would not be compromised, decline permission to board, noting that the vessel is proceeding in accordance with international law, as reflected in the Law of the Sea Convention.

18.4.3. If Iranian forces board a U.S.-flagged commercial vessel, the crew should not forcibly resist the boarding party. Refraining from forcible resistance does not imply consent or agreement to that boarding.

18.4.4. It is recommended that vessels in the Persian Gulf remain as far as possible from Iran's territorial sea without compromising navigational safety. When transiting eastbound in the Strait of Hormuz, it is recommended that vessels transit close to Oman's territorial sea.

18.4.5. Industry transit advice for the Arabian Gulf, Strait of Hormuz, and Gulf of Oman was established on 9 November 2023, and can be found on the Maritime Global Security website at maritimeglobalsecurity.org/geography/goa-etc/.

18.5. **Piracy and Armed Robbery Against Ships:** Recent cases of piracy pose a threat to commercial vessels operating in the Gulf of Aden, Arabian Sea, and Somali Basin, and Northwestern Indian Ocean. Since November 2023, there have been three boarding/hijacking incidents, representing the first such attacks against commercial shipping in the region since March 2017. Pirates may utilize captured fishing vessels as motherships to target vessels operating hundreds of miles from the coast of Somalia. In November 2023, one Liberian-flagged vessel was boarded in the Gulf of Aden; in December 2023, one Malta-flagged vessel was hijacked in the Arabian Sea; and in January 2024, one Liberia-flagged bulk carrier was boarded in the Indian Ocean. Specific case details are available via the Office of Naval Intelligence's weekly "Worldwide Threat to Shipping" product at <https://www.oni.navy.mil/ONI-Reports/Shipping-Threat-Reports/Worldwide-Threat-to-Shipping/>.

18.5.1. The Best Management Practices to Deter Piracy and Enhance Maritime Security in the Red Sea, Gulf of Aden, Indian Ocean and Arabian Sea (BMP5), and Maritime Global Security website

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

at: <https://www.maritimeglobalsecurity.org> should be consulted prior to operating in the above listed geographic waters.

18.5.2. Transit by yachts and privately owned sailing vessels through the region is hazardous and may result in capture. The U.S. Government advises against all operation of yachts and pleasure craft in these areas. American citizens abroad should inform the nearest U.S. embassy or consulate of their plans to transit the area and/or update their information via the Smart Traveler Enrollment Program at: <https://step.state.gov/step/>. Yachting guidance can be found at: <https://on-shore.mschoa.org/reference-documents/advice-for-sailing-vessels>.

18.5.3. **UAVs:** Outside of the Southern Red Sea, Bab el Mandeb Strait, and Gulf of Aden, UAV attacks also pose a threat to commercial vessels in the Persian Gulf, Strait of Hormuz, Gulf of Oman, and Arabian Sea. The most recent attacks were on a Malta-flagged vessel in the Arabian Sea in November 2023, and on a Liberian-flagged vessel in the Arabian Sea in December 2023.

- If U.S.-flagged commercial vessels observe or hear a suspected UAV, crewmembers not needed for the safe navigation and operation of the vessel should be relocated to a safe space on the vessel until the threat has passed.

18.6. **Limpet Mines:** Limpet mines have been used to damage commercial vessels on multiple occasions in recent years and are primarily a threat to commercial vessels in the Persian Gulf, Strait of Hormuz, and the Gulf of Oman. Limpet mines, or similar improvised explosive devices, can be attached to vessel hulls, above or below the waterline, via swimmers or small boats, while a vessel is berthed, at anchor, or underway.

18.6.1. When operating in these waters, U.S.-flagged commercial vessels should maintain a close lookout and remain vigilant for suspicious activity to include the approach of swimmers or small boats. Close attention should be given to the vessel's waterline, especially at slow speeds, at anchor, and when moored.

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

18.6.2. If a mine has been, or was attempted to have been, attached to a vessel, crewmembers not needed for the safe navigation and operation of the vessel should be relocated to a safe space on the vessel until the threat has passed.

18.6.3. Guidance: U.S.-flagged commercial vessels operating in these waters are advised to exercise caution, review security measures, and monitor VHF Channel 16. To afford best protection in the region, U.S.-flagged commercial vessels are also advised to in the event of any attack, incident, or suspicious activity, immediately:

18.6.3.1. Activate the Ship Security Alert System

18.6.3.2. Contact the U.S. Fifth Fleet Battle Watch

18.6.3.3. Contact UKMTO

18.6.3.4. Simultaneously register with both the United Kingdom Maritime Trade Office (UKMTO) and the IMSC watch 24 hours prior to entering the Indian Ocean Voluntary Reporting Area by sending UKMTO and IMSC, via a single e-mail, the Initial Report from Annex D of (BMP5). Include the estimated times of arrival at the Suez Canal, Bab el Mandeb Strait (BAM), and Strait of Hormuz (SoH) in line 10 of the report and add line 14 for comments as needed (e.g., speed restrictions or other constraints, anticipated time of entering/exiting the SoH Traffic Separation Scheme; an outline of the navigation plan for operating in the SoH and Persian Gulf, etc.). Utilize other reports included in Annex D of BMP5 as necessary.

18.6.3.5. Vessels operating in this area are advised to include both NAVCENT NCAGS and the IMSC watch on all updates or incident report emails. By including both as addressees on each email, awareness will be enhanced without creating an additional reporting burden.

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

18.6.3.6. Conduct a pre-voyage risk assessment and incorporate appropriate protective measures into vessel security plans.

18.6.3.7. The Maritime Global Security website at <https://www.maritimeglobalsecurity.org/> offers industry issued best practices and guidance to mariners by geographic region and provides contact and subscription information for regional maritime security reporting centers, particularly in high risk-areas.

18.6.3.8. Answer all VHF calls from coalition navies. Vessels should be aware that U.S. and other coalition naval forces may conduct maritime awareness calls, queries, and approaches to ensure the safety of vessels transiting these listed waters.

18.6.3.9. Due to the risks of piracy, kidnapping, hijacking, and robbery while operating within U.S. Coast Guard designated High Risk Waters, U.S.-flagged commercial vessels are required to comply with the Guidelines for U.S. Vessels Operating in High-Risk Waters contained in U.S. Coast Guard Maritime Security Directive 104-6 (Rev 8) and comply with their Coast Guard approved Vessel Security Plan annex on counter piracy. The U.S. Coast Guard Office of Commercial Vessel Compliance announced in the Federal Register in August 2021 the availability of Revision 8 to Maritime Security (MARSEC) Directive 104-6. U.S. vessel owners and operators who needed to act under previous versions of MARSEC Directive 104-6 should immediately contact their local Coast Guard Captain of the Port or District Commander for a copy of Revision 8.

18.6.3.10. Per 33 CFR 101.305, report all suspicious activities, breaches of security, and transportation security incident events involving U.S. vessels or persons to the U.S. Coast Guard National Response Center. Additional U.S. Coast Guard port specific requirements may be found in Port Security Advisory 1-22

19. Maritime Advisory 2022-007-Gulf of Guinea-Piracy/Armed Robbery/Kidnapping for Ransom.

- 19.1. Issued on 6 July 2022. This revised advisory cancels U.S. Maritime Advisory 2022-001. Issue: Piracy/Armed Robbery/Kidnapping for Ransom (KFR) serves as a significant threat to U.S.-flagged vessels transiting or operating in the Gulf of Guinea (GoG) as well as U.S. mariners onboard a vessel or transiting to or from a vessel in the GoG. Guidance: Mariners transiting this area should visit the Maritime Domain Awareness for Trade-Gulf of Guinea MDAT-GoG) website at <https://gog-mdat.org/home> and the NATO Shipping Centre website at <https://shipping.nato.int/nsc/operations/global-maritime-risk/west-africa->

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

gulf-of-guinea for additional information on threats and specific recommendations for their vessels.

19.2. Additionally, the “Best Management Practices to Deter Piracy and Enhance Maritime Security Off the Coast of West Africa including the Gulf of Guinea” (available under the Geography – Gulf of Guinea pull-down menu at <https://www.maritimeglobalsecurity.org/>) provides additional guidance and resources for operating in this area. For any maritime industry questions about this advisory, contact GMCC@uscg.mil.

20. Pirate and maritime crime activities in West African waters are assessed as high-risk due to a recent successful hijacking incident. This past week, there were two reports of criminal or piracy activity.

21. ANGOLA: On 25 May, robbers boarded a tanker anchored in Luanda Outer Anchorage.

22. NIGERIA: On 23 May, the duty crew on a general cargo ship berthed at Lagos port noticed that robbers had broken into the storeroom.

23. In other parts of the world, there were **seven reports of piracy or crime at sea during the reported period, **six of which occurred at the Singapore Straits TSS.** UMS HQ has lately highlighted the proliferation of crime at sea in Singapore/Indonesian waters. While the criminal activities are primarily confined to petty thefts currently, it would be unthinkable if the perpetrators were to mimic the Nigerian criminals' proven ‘business’ model by kidnapping a few key crew members and then negotiating for ransoms. The situation could explode to be worse than the present piracy threats in West Africa or the Indian Ocean should this happen!**

24. INDONESIA: On 27 May, five perpetrators armed with knives boarded a Marshall Islands-flagged tanker while underway in the eastbound lane of the Singapore Strait Traffic Separation Scheme (TSS).

25. BANGLADESH: On 26 May, 14 robbers armed with multiple weapons boarded a Bangladesh-flagged general cargo ship while anchored at Mongla port.

26. INDONESIA: On 25 May, three perpetrators boarded a Malta-flagged bulk carrier while underway in the eastbound lane of the Singapore Strait TSS.

27. INDONESIA: On 23 May, four robbers, one armed with a knife, boarded a Singapore-flagged product tanker while underway in the eastbound lane of the Singapore Strait TSS.

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

28. INDONESIA: On 23 May, five robbers armed with long pipes boarded a Marshall Islands-flagged bulk carrier while underway in the eastbound lane of the Singapore Strait TSS.

29. INDONESIA: On 22 May, five perpetrators boarded a Cyprus-flagged bulk carrier while underway in the eastbound lane of the Singapore Strait TSS.

30. INDONESIA: On 22 May, four perpetrators armed with knives boarded a Liberia-flagged bulk carrier while underway in the eastbound lane of the Singapore Strait TSS.

Instructions and Piracy Related News

31. Warning for Red Sea, Bab el-Mandab Straits and Gulf of Aden

31.1. There have been numerous attacks and suspicious approaches reported near the southern entrance to the Bab el Mandeb Strait during the reporting period. Levels of pirate activity in the Indian Ocean remain elevated, with five hijacks reported since March 2017 (MT ARIS 13, CASAYR II NO.30, AL KAUSAR, SALAMA 1 and OS 35). The threat of further attacks and hijacking remains high. All Masters are advised to exercise heightened vigilance within the High Risk Area (HRA), stringently implement BMP4 and liaise closely with embarked armed security teams (AST) and regional authorities. If not making calls in Yemen, it's recommended by UKMTO that vessels should use the IRTC and western lane of the Traffic Separation Scheme (TSS) in the Bab el Mandeb / southern Red Sea region, to provide a greater lee from Yemen. Further such incidents and hijackings are likely to take place, and all vessels transiting this region are advised to remain vigilant. While international naval patrols and anti-piracy measures on-board commercial vessels have practically eradicated Somali piracy since its peak in early 2011, poverty coupled with other factors that motivate pirates remain and some vessels transiting this region may have increasingly become complacent in the belief that the piracy threat had diminished.

31.2. While the international community has over the past several years taken significant steps in order to improve security in the region, including boosting naval forces in the area and requiring ships to take protection measures, including reporting in and out of high risk areas, sailing at top speed as far away as possible from the Somali coast and travelling with armed escorts on-board, the threat of an attack and hijacking remained as the real root of the cause on the ground in Somalia has never been properly

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

addressed. After five years without a successful attack, analysts say that complacency may have set in and this week's successful hijacking is likely to result in potential copycat attacks, as pirate action groups head-out in a bid to successfully hijack a commercial vessel. Masters are advised to remain vigilant at all times inside the HRA and are advised to adhere to strict guidance and protective measures as set down in BMP5. Sailing yachts should avoid transiting the HRA. Past activity has demonstrated that pirates will attack both large and small yachts transiting this region. While successful attacks and hijackings of merchant vessels have significantly decreased over the past two years, the possibility of attacks and the successful hijacking of sailing vessels continue to remain high. This is due to the reduction of revenue sources from pirated merchant vessels and the fact that sailing yachts are vulnerable and easier targets. PAG's continue to conduct "soft approaches" on merchant ships transiting the area. Skiffs have approached vessels in order to probe the reaction of the crewmembers and any possible Privately Contracted Armed Security Personnel (PCASP) on-board. If the pirate approach does not elicit a response, the pirates will likely proceed with an attack, in which additional skiffs may participate. Vessels transiting the greater Gulf of Aden region should operate under a heightened state of alert. This is due to increasing tensions in the region, which in turn can escalate the potential for direct or collateral damage to vessels transiting the region. These threats may come from a number of different sources such as missiles, projectiles, or waterborne improvised explosive devices. Houthi rebels have claimed responsibility for the 1 October 2016 attack on a UAE vessel.

- 31.3. UMS HQ advises all vessels transiting this region to report any hostile activities immediately. Somali pirates have recently shown an ability to mount hijacking expeditions far out into the Gulf of Aden and the Indian Ocean, and inshore traffic might be an easier target. EUNAVFOR spokesperson Commander Jacqui Sherriff said that the recent series of attacks against commercial shipping again highlights the need for vigilance and adherence to self-protection measures (by the deployment of on-board AST) and compliance to Best Management Practices (BMP) 5. It is crucial that Somali pirates are denied opportunities to attack vessels so that there will be no chance of a successful hijack. One successful hijack is one hijack too many because it will encourage and motivate more Somalis to taking up piracy!

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

- 31.4. CMF and EUNAVFOR and intelligence agencies have warned of increased complacency amongst stakeholders which may give rise to opportunities for piracy action groups and organizations funding piracy activities to revive the threat.

32. Actions to be Taken when a Vessel with On-Board UMS Maritime Marshals is Approached by a Naval Craft.

- 32.1. On 16 Dec 23, in the face of increased attacks from pirate action groups and approaches from naval craft, UMS HQ issued the orders on actions to be taken when a naval craft approaches a vessel. These orders were issued to all Team Leaders, and they were further personally briefed by the UMS Operation Officer because of the importance of the subject and the requirement that these orders be fully understood and complied with.
- 32.2. UMS Maritime Marshals onboard a vessel are to protect the vessel and crew members from pirate action groups. They are equipped with weapons and equipment to handle the threat posed by pirate action groups and **ARE NOT MEANT TO DETER NOR OPPOSE ANY NAVAL CRAFT THAT MAY APPROACH THE VESSEL FOR WHATEVER PURPOSES.** The Orders is repeated in the paragraphs below.
- 32.3. If a naval craft approaches our vessel, the following actions will be taken.
- 32.3.1. The Team Leader is to alert and discuss the approach of the naval craft with the Master.
 - 32.3.2. The Master must notify the vessel's owner/HQ of the situation.
 - 32.3.3. The team Leader will notify the UMS Operations Officer/UMS HQ.
- 32.4. If the naval craft asks the vessel to stop, the Master will take the appropriate action, as per his discussion with his HQ.
- 32.4.1. Based on the decision to stop, the Team Leader will immediately give orders to his Maritime Marshal(s) to unload and clear their weapons.
 - 32.4.2. **NO WEAPON WILL BE LOADED.**
 - 32.4.3. **UNDER NO CIRCUMSTANCES WILL ANY MEMBER OF THE MARITIME MARSHAL TEAM SHOW HIS WEAPON TO DETER THE NAVAL CRAFT, FIRE WARNING SHOTS, OR FIRE ANY SHOT AT THE**

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

APPROACHING NAVAL VESSEL. THE TEAM LEADER IS TO ENSURE THIS IS CLEARLY BRIEFED AND UNDERSTOOD TO HIS TEAM MEMBERS. THERE MUST BE NO DEVIATION FROM THIS ORDER.

32.5. When the vessel stops as ordered and naval personnel come on board, UMS Maritime Marshals will take the following actions:

32.5.1. All Maritime Marshals should keep low on the deck and cover their head with both hands, with their hands visible. They will all be together, lined up side by side.

32.5.2. On no account should any Maritime Marshal make any movement that could be misinterpreted as hostile actions. Their individual weapon should be placed on deck next to the Maritime Marshal, and at no time should any Maritime Marshal handle his weapon.

32.5.3. Do not take any videos or photographs.

32.5.4. All Maritime Marshals should be ready to be questioned on their identity and roles. They will answer the questions truthfully and cooperate fully with the naval personnel on board.

32.5.5. The Team Leader will be the spokesperson of the Maritime Marshal Team, working closely with the Master.

32.6. Remember to be cooperative and calm. There is no need to be unduly concerned as the vessel and crew members, including the Maritime Marshal Team, have not committed any wrongdoing.

32.7. After the naval personnel depart and the vessel resumes its mission, the Team Leader reconstitutes the Team to continue the mission.

32.8. The Team Leader will report the matter to UMS HQ accordingly.

33. Piracy in the Indian Ocean HRA has NOT Been Eradicated

33.1. UMS HQ has always maintained this position not to give stakeholders a sense of false security. The current development of piracy raging its ugly head again in the waters off Somalia and in the Indian Ocean is testimony to the accuracy of our analysis.

33.2. The decision by world shipping bodies such as BIMCO and the like has given the wrong perception that piracy in the Indian Ocean HRA has been eradicated. **Nothing can be further from the truth!**

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

- 33.3. Piracy threats have been reduced due to the strong presence and sustained effort by naval forces, namely EUNAVFOR and the US-led Combined Military Force (CMF) and the deployment of armed security teams (AST) onboard commercial vessels. The deployment of ASTs onboard commercial vessels since the peak of the piracy threat in 2008 has proven effective, as no vessel with an AST has ever been hijacked.
- 33.4. Naval and intelligence agencies think pirate syndicates lie low due to the strong deterrence and are involved in other criminal activities, such as drug smuggling. These pirate and criminal syndicates have not been wiped out, and given the correct circumstances and environment, they can get their acts together quickly.
- 33.5. The pirate syndicates are privy to the announcement of the lifting of the HRA. They could view the situation in 2023 as a golden opportunity to resume their proven lucrative 'business'. The current political situation in the Middle East is a significant distraction to the naval forces that will not focus their attention and presence on the more critical military problems with the Iranian-backed Houthis.
- 33.6. Given Somalia's poor socio-economic situation, thousands of Somalians will be more than happy to take up arms to hunt and hijack commercial vessels again. The lack of local law enforcement to prevent piracy activities will make this revival a strong possibility. Therefore, the comeback scenario cannot be discounted and is a likely possibility.
- 33.7. Therefore, from a risk assessment point of view, the risk level in 2024, if deterrence measures are removed, the risk of piracy in 2024 will be objectively higher than in the last 5-6 years.
- 33.8. **Low piracy threat does not mean NO PIRACY THREAT!**

34. Present Tactics Employed by the Houthis and What We Should Do

- 34.1. UMS HQ recently studied the profile of attacks against commercial vessels and made the following observations.
- 34.2. They comprised attacks on commercial vessels by 2-3 skiffs with about 5-9 armed personnel on board (POB). Some vessels have ladders to suggest their intention to board the vessels.

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

- 34.3. They approached the commercial vessels, exchanged fires, and then kept a stand-off distance of about 1-2nm.
- 34.4. In some cases, one or more unmanned surface vessels (USVs) would strike the vessels.
- 34.5. This is what is happening.
 - 34.5.1. The POB on board the skiffs could be either pirates working with the Houthis or Houthis personnel themselves.
 - 34.5.2. The approach to a vessel is, in military terms, " recce by fire." The objective is to ascertain if the vessel is protected by armed personnel on board because a vessel that is not protected by armed personnel could be easily boarded and hijacked. If they confirmed that the vessel was not protected, they would simply try to board the vessel.
 - 34.5.3. Once they confirmed that the vessel is protected, after exchanging fires they will withdraw if they are just pirates not working with the Houthis.
 - 34.5.4. If the POB are pirates working with the Houthis or Houthis personnel themselves, they would withdraw to a stand-off distance of about 1-2nm and continue trailing the vessel. Why?
 - 34.5.5. The POB would use their laser designator(s) to guide the USV(s) to engage the commercial vessel. These laser designators have an effective range of about 1-2nm and the further the target is, the less accurate the designation of the USV will be against the target vessel. For this reason, have you noticed that these attacks always happen in daylight hours because the POB does not have night capabilities to designate their lasers at night or in poor visibility?
- 34.6. What must we do?

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

34.6.1. Apply the current SOP when responding to Alert Grey and Alert Red. **The vessel should be transiting at maximum speed.**

34.6.2. After the withdrawal of the skiffs and if the skiffs are still trailing the vessel, it suggests that the threat has not disappeared. Be ready to respond to an attack against USV. UMS HQ has issued an SOP on how to destroy an approaching USV. To perfect this drill, UMS maritime marshals should conduct training and rehearsals regularly as part of their anti-piracy drill.

34.6.3. **The vessel must continue to transit at maximum speed to make it more difficult for the laser designators to designate our vessel.**

34.6.4. After the skiffs' withdrawal, the personnel in the citadel should not remain there as the threat (if any) is different, and they should remain at a location above the vessel's watermark. This presupposes that all Masters have designated this location and approved it by their respective Company Chief Security and Safety Office.

35. EU Extends Naval Operation ATALANTA Until 2027 as Somali Piracy Surges in Indian Ocean

35.1. In last week's WETA, UMS HQ warned that with the Indian Ocean monsoon season-ending, Somali-based piracy activities could be expected to rise. As this is not bad enough news, the European Council, based on the socio-political and economic situation of Somalia and neighbouring countries, has extended its counter-piracy mission, Operation ATALANTA, for two more years, coming amid a dramatic resurgence of Somali piracy that has seen 43 incidents in the past year.

35.2. The renewed mandate to February 2027 strengthens ATALANTA's role in maritime security across the Somalia coast, Gulf of Aden, West Indian Ocean, and parts of the Red Sea. The operation will maintain its focus on combating piracy while expanding efforts to reduce illicit trafficking at sea.

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

- 35.3. Recent intelligence reports highlight the necessity of the extension. In October 2024, Somali authorities confirmed a group of 13 heavily armed pirates, equipped with AK-47s and RPGs, departed from Ceel Huur Area toward the Somali Basin. Earlier this month, a Chinese fishing vessel allegedly hijacked off Somalia's northeastern Puntland coast.
- 35.4. The pirates' typical strategy involves hijacking dhows to use as mother ships, enabling attacks up to 600 nautical miles off Somalia's eastern coast. The Gulf of Aden's eastern region remains particularly vulnerable.
- 35.5. This year has already seen significant piracy incidents, including the hijacking of two merchant vessels. The *MV Abdullah* was released after a reported \$4 million ransom payment, while the *MV Ruen* required Indian Navy intervention after a three-month captivity.
- 35.6. Experts suggest the situation in the region has been exacerbated by the maritime industry's reduced security measures following the removal of the Indian Ocean High Risk Area designation in January 2023.
- 35.7. Operation ATALANTA, established in 2008, has played a crucial role in maritime security, protecting World Food Programme vessels and other vulnerable shipping in the region. The mission's extension comes alongside renewed mandates for EUCAP Somalia and EUTM Somalia, forming part of a comprehensive EU strategy to enhance regional security capabilities.
- 35.8. With the Indian Ocean monsoon season concluding, maritime security experts anticipate increased piracy activity in the coming months. This development, coupled with ongoing Houthi attacks in the Red Sea, presents a complex security challenge for international shipping in the region.

36. Somali Pirates Head Back to Sea

- 36.1. Shipping has been warned that Somali pirates are back hunting for targets.
- 36.2. British maritime security consultants Ambrey has issued a notice to clients detailing a suspected pirate action group sighted departing Marreya, Eyl, to the northeast of Somalia.

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

- 36.3. Merchant vessels are advised to increase vigilance, and to engage armed security where possible if the vessel has a permissible freeboard.
- 36.4. Yesterday the European Union Naval Force (EUNAVFOR) Operation ATALANTA reported that a Yemeni-flagged dhow was taken by pirates on Sunday. Then dhow is now likely being used by pirates as a mother ship to stage attacks on merchant vessels.
- 36.5. Piracy was rampant off Somalia for a four-year period from 2008, but then it went dormant for about five years. From March last year, Somali pirates have been back in the headlines, abducting a number of vessels and their crews.

37. U.S. Ramps Up Defenses for Naval Support Facility Diego Garcia

- 37.1. A number of recent satellites passes over Diego Garcia – historically part of the British Indian Ocean Territory, now part of Mauritius - have identified the presence on the airfield of up to six F-15 strike aircraft. There is normally no US aircraft permanently stationed on Diego Garcia, with aircraft deployed only for specific short-duration tasks and missions. The presence of the F-15s on Diego Garcia has been confirmed by official Indo-Pacific Command channels, which have specified that the aircraft in question are F-15Es with a dual air-to-air and air-to-ground/sea mission capability. This acknowledgement advertises that the deployment is meant for deterrence purposes, to warn off a potential adversary and to give notice that a threat has been identified and can be dealt with. The nature of the threat remains undefined, but there are a number of possibilities to be considered.
- 37.2. Iran's Islamic Revolutionary Guard Corps (IRGC) specifically has referenced and threatened the US naval and air presence on Diego Garcia on numerous occasions; alongside general threats made recently to target any foreign bases from which the United States would mount an attack on Iran. Rear Admiral Alireza Tangsiri, the IRGC Navy (Nedsa) commander, has said that converted tankers *Shahid Mahdavi* (110-3) and *Shahid Bagheri* (110-4) are configured to undertake long-range deployments and can be equipped with both ballistic missiles and drones. The Admiral noted that the *Shahid Mahdavi* had "cruised in the area of American forces

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

stationed on Diego Garcia” on a 40-day deployment through the Indian Ocean cruise, which ended on May 18, 2024. Both ships have demonstrated the capability to fire Fateh-313 missiles with a range of 500 kilometers, as well as medium-range drones.

37.3. In the latest satellite imagery available, both the Nedsa drone carriers were at anchor in the Bandar Abbas roads (*Shahid Mahdavi* at 27.0693N 56.1881E and *Shahid Bagheri* at 27.0878N 56.2001E), and have been so since at least the beginning of May. However, while the threat focus is usually on these two ships, other Nedsa ships can also launch missiles and drones.

37.4. An article published by Iran’s Press TV on September 23, 2024, also noted that Diego Garcia would be within range of the IRGC’s Shahed-136B drone, if launched from Iran’s south-east coast.

37.5. At such range, neither the regular Iranian Navy nor Air Force could realistically press home an attack on Diego Garcia. In April 1981, during the Iran-Iraq war, the Iranian Air Force demonstrated that it had the ability to mount attacks in depth, destroying 25 Iraqi aircraft on the H-3 airfields close to the Jordanian border. Although the Iranians still have the very same aircraft in service, their reliability is now dubious, and the range to Diego Garcia is much greater, making such an operation unfeasible. The Iranian Navy is proud of its 86th Flotilla round-the-world cruise in 2022, but its frigates and the single operational Kilo-class submarine would be vulnerable and lack the support necessary to operate at long range.

37.6. Any IRGC attempt to attack Diego Garcia would be limited in scope, and might yet rely on a novel attack concept not yet unidentified. To get close, they would have to rely on surprise and on remaining undetected in the deep ocean. But the Iranians are unlikely to know how effective US surveillance is - and with the F-15Es now protecting the island, are unlikely to want to try and find out.

38. New Zealand-led Combined Task Force 150 and Royal Navy Interdict Over \$36 Million Worth of Illicit Drugs

38.1. A U.K. Royal Navy ship, working in direct support of New Zealand-led Combined Task Force (CTF) 150 of Combined Maritime Forces (CMF), seized over USD \$36 million dollars' worth of illicit narcotics from a vessel in the Arabian Sea, May 22.

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

38.2. HMS Lancaster seized 1000kg of heroin, 660kg hashish, and 6kg of amphetamine while patrolling in the North Arabian Sea. Identifying and tracking a suspicious vessel using an uncrewed aerial system, the ship's boarding team went to investigate. Two sea boats with embarked Royal Marine Boarding Teams approached the vessel while a WT2 Wildcat helicopter with a Royal Marine sniper team embarked, conducted overwatch.

38.3. Once aboard, the team discovered multiple packages containing illicit narcotics. The packages were transported back to the ship for testing to confirm the contents and subsequently disposed of.

38.4. Lancaster's commanding officer, Royal Navy Cmdr. Chris Chew, said his crew's motivation, commitment and dedication have once again paid off.

38.5. "This is another example of where Lancaster has delivered at range, in isolation, utilizing her own organic assets," Chew said. "Whether they come in the form of her Wildcat, un-crewed air system, embarked intelligence team or her Royal Marine Boarding Team, [they delivered] on operations in support of the Combined Maritime Forces construct and New Zealand-led CTF 150."

38.6. The Commander of Combined Force 150, Royal New Zealand Navy Cmdr. Rodger Ward, said interdiction operations such as this are a true team effort, requiring tight coordination, "from the men and women here in the headquarters in Bahrain reaching through to those out on the oceans disrupting drug smuggling operations at the coal face."

38.7. "I'd like to acknowledge the 210-strong ship's company from HMS Lancaster for continuing to get amongst it day-after-day," he said. "Everyone in the team can be proud of their efforts to disrupt the criminal and terrorist organizations that continue to use illicit narcotics to fund their activities. This is a significant blow to their revenue stream. This successful interdiction is tantamount to the tenacity, training and professionalism from our Royal Navy partners."

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

38.8. HMS Lancaster is a Duke-class Type 23 frigate of the Royal Navy deployed to the Middle East region to provide regional maritime security and stability.

38.9. CTF 150 is one of five task forces under CMF, the world's largest international naval partnership. CTF 150's mission is to deter and disrupt the ability of non-state actors to move weapons, drugs and other illicit substances in the Indian Ocean, the Arabian Sea and the Gulf of Oman.

38.10. Combined Maritime Forces is a 46-nation naval partnership upholding the international rules-based order by promoting security and stability across 3.2 million square miles of water encompassing some of the world's most important shipping lanes.

39. Royal Navy Carrier Heads "East of Suez"

39.1. Early on May 24, ships of the HMS *Prince of Wales* carrier strike group began a southerly transit of the Suez Canal. Although CSG 25 flagship HMS *Prince of Wales* (R09) was not spotted, HMS *Dauntless* (D33), Canadian HMCS *Ville de Quebec* (F332), Spanish ESPS *Mendez Nunez* (F104), Royal Norwegian Navy Nansen Class frigate HNoMS *Roald Amundsen* (F311) and Norwegian logistics vessel HNoMS *Maud* (A530) were seen in the northern reaches of the canal by @MT_Anderson early in the day. The complete CSG is now likely to be through the Canal.

39.2. @MT_Anderson spotted the CSG on imagery passing through the mid-Canal Great Bitter Lake, and also identified that the CSG was accompanied by two US Navy Arleigh Burke destroyers, one of which could be USS *Truxtun* (D103). The presence with the CSG of a US Navy presence is politically useful, as the Houthis are in an agreed ceasefire with the United States, and the Houthis are unlikely to be able to identify individual units of the CSG.

39.3. At about the same time the USS *Harry S Truman* (CVN-75) carrier strike group sailed westwards through the Straits of Gibraltar and out of the Mediterranean, homeward bound.

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

39.4. Now that the military operation against the Houthis is over, the CSG 25 commander has the choice of making directly for the Bab el Mandeb and clearing the Red Sea. But the timetable for such a move would be predictable. Instead, he may wish for a period to conduct maritime security operations in the central Red Sea, the area from which the USS *Harry S Truman* (CVN-75) mounted its air campaign against targets in Yemen. An exit southwards from the Red Sea would then become less predictable.

39.5. HMS *Prince of Wales* has on board two F-35B squadrons (809 Naval Air Squadron and 617 Squadron RAF), as well as Wildcat and Merlin surveillance helicopters, with Chinooks to lift the Royal Marines onboard.

40. West Africa

40.1. Unlike the presence and substantial involvement of international navies, numbering more than 43 countries and the legit deployment of armed security team (AST) onboard commercial vessels transiting the East Africa and Indian Ocean HRA, the situation in the West Africa HRA is about just the opposite. Nigerian government laws and regulations prohibit the deployment of ASTs other than those brokered by local security companies that used personnel from the Navy, which the government has declared as not supported by it. Besides the Nigerian Navy, no other naval forces provide security and deterrence to the pirates managed by criminal syndicates operating from Nigeria.

40.2. In other words, the waters and ports around Nigeria are almost a perfect hunting ground for the local criminal syndicates. Given this situation, the threat of piracy at this point of time is higher and more dangerous than that posed by Somali pirates in the East Africa and Indian Ocean HRA, although depending on the continued presence of the navies of EUNAVFOR and CMF and the other independent naval forces and the continued use of on-board ASTs, the situation may quickly reverse. Somali pirates still have the intent, skills, and resources to attack merchant ships. Fundamentally naval forces and intelligence agencies have repeatedly called for continued vigilance and preparedness in the fight against the threat of piracy at both the East Africa and Indian Ocean HRA and the West

Universal Maritime Solutions Pte Ltd

No. 21 Bukit Batok Crescent, WCEGA Tower, #28-70, Singapore 658065

Africa HRA. Ignoring these warnings places one's business, vessels, and crew members at risk!

40.3. Intelligence agencies noted that Nigeria's pirate action groups (PAGs) have been relatively quiet in the last 2-3 months. However, this does not suggest that the piracy threat in West Africa has been eradicated. PAGs may strike anytime and the only protection and solution is to be well prepared for such an eventuality.

41. UMS HQ advises all stakeholders never to take the security and safety of their vessels and crew members for granted. **CURRENT LOW PIRACY THREAT doesn't mean NO PIRACY THREAT!**

42. Remember Always "Be Vigilant, Be Safe and Never Be Sorry"

LTC (Ret) Harpal Singh

Operations Officer
